

CO-CREATION: Recyclable Soft Packing Materials

Project duration: 24.1.–30.6.2019

WANTED PARTNERS:

*Companies from packaging and construction sectors:
raw material suppliers, material manufacturers,
material converters and end users*

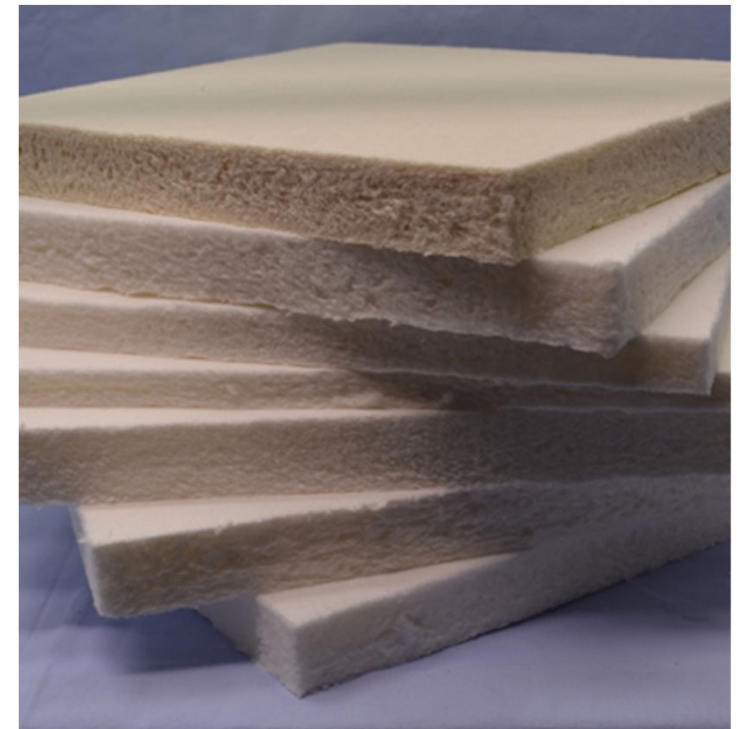

NAME OF THE LEADING ORGANIZATION

Contact: Senior Scientist, *Petri Jetsu*

petri.jetsu@vtt.fi, +358 40 778 4971

Contact: Innovation Advisor Research, Development
and Innovation, *Markku Oikarainen*

markku.oikarainen@tamk.fi, +358 40 826 7615

CO-CREATION: Recyclable Soft Packing Materials

AIM & CONTENT OF THE CO-CREATION PROJECT

RESPA is a project preparation project, which goal is to build-up a Business Finland (BF) joint co-innovation action consists of research project and parallel company projects. Tasks of the project are

1. State of the art
2. Feasibility of new materials
3. Build-up of co-operation network
4. Preparation of co-innovation applications

BENEFIT & COMPETITIVE ADVANTAGE OF THE SOLUTION

Bio-based, recyclable and resource efficient compared to existing solutions.

TARGET MARKETS & GLOBAL MARKET POTENTIAL

Materials like padding materials, flooring underlayments, thermal insulations and acoustic panels for packaging and construction sectors

Global market potential > 100 billion €
