

# INVEST IN FINLAND – SERVICES

## DATA COLLECTION

### Relevant information for fact-based decision making

At the business planning stage data collection is essential but time consuming. Invest in Finland has been supplying high-quality data collection services to a wide variety of international companies for more than 20 years. There's no need to tie up your resources – let us help you.

## OPPORTUNITY ANALYSIS

### Solutions for your business needs

Looking for growth for your business? Use our advisory services to ensure that you will be well positioned when you decide to make your move. Our professional advisors will be an extra resource for your business development team, providing valuable assistance and in-depth market know-how.

## MATCHMAKING

### Let us open the doors for you

Finland is ranked at the top in a number of international studies and surveys. One area in which our performance is considered particularly good is networking between private companies, the public sector and educational institutions. We can introduce you to the players who will be important for your business. We have the knowledge and the contacts – and will be happy to both organise and accompany you on fact-finding missions to all the key players.

Whatever your needs are, Invest in Finland's advisors will be pleased to help you. Our services are free of charge and always tailored to meet your precise needs.

## LOCATION MANAGEMENT

**Helping you select the perfect site**

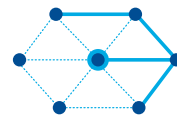

Location management is a key service provided by Invest in Finland. We can identify locations with the best potential for your business operation. Whether the issue is finding the best talent, choosing the right campus for a data center or finding international schools for the children of your expatriate employees, we will help you find a suitable solution. Once a short list has been compiled, we can arrange visits and accompany you to meetings.

## ENTRY ALTERNATIVES

**Evaluating most suitable market entry strategies**

Localising your business plan requires careful evaluation of potential entry alternatives. Our fact-based advisory services provide extensive guidance on market entry strategy. We can answer your questions regarding the requirements for different types of business entities, registration and how the Finnish taxation system works. With a concrete entry plan in place, decisions on how to proceed are uncomplicated.

## SETTING UP A BUSINESS

**Tools and plans for establishing or expanding a business in Finland**

Setting up a business in Finland is quick and easy. Our extended network of contacts with public authorities and service providers in the private sector simplify everything involved in starting up a business. Launching your new operation on schedule – with or without the media – will be important to your success. Let us help you make it happen.
