

# Move2Green roadmap

## Decarbonization

- Battery condition measurement
- Battery systems and components
- Electrical installation
- Chargers & charging systems
- Other EV OEMs

### Transition to electrification systems for heavy material handling

### Alternative energy sources and storage

## Sustainable service business and new value creation models

- Safety & Security
- HW development
- AI development
- Autonomous & assisting driving
- Model-based design
- EU regulation, standardization
- Data acquisition
- Data analysis
- Gateway HW and SW
- Control systems
- Research partners

### Net zero data-driven services and processes for optimised logistic chains

### Responsibility
