**Seminar introducing European programs  
to the railway industry in Finland**

**Team Finland House, Helsinki, 25 Oct 2019**

# RAILWAYS IN EUROPE – SHIFT2RAIL AND ITS SUCCESSOR PROGRAM

- The Smart Mobility Finland Program and its ambition for European collaborations  
*Tom Warras, Business Finland, National Contact Point for H2020 Transport*
- Presentation of Shift2Rail and its open call 2020  
*Giorgio Travaini, Head of Research & Innovation, Shift2Rail*
- How UNIFE can support manufacturing companies for answering Shift2Rail open calls  
*Nicolas Furio, Head of Technical Unit, UNIFE*
- Transforming Europe's Rail System, a potential partnership in Horizon Europe  
*Tom Warras, BF, and Giorgio Travaini, Shift2Rail*
- The ERRAC platform and the ERRAC 2030 R&I priorities published in September 2019  
*Nicolas Furio, Head of Technical Unit, UNIFE*
- Discussion on themes most interesting for the Finnish railway industry  
*Panel*

# **Smart Mobility Finland Program and its ambition for European collaborations**

Tom Warras, executive coordinator

Helsinki, 25 Oct 2019

# FUNDING, NETWORKS AND INTERNATIONALIZATION SERVICES

Smart Mobility program runs from 2018 to 2022 with a total budget of EUR 100 million

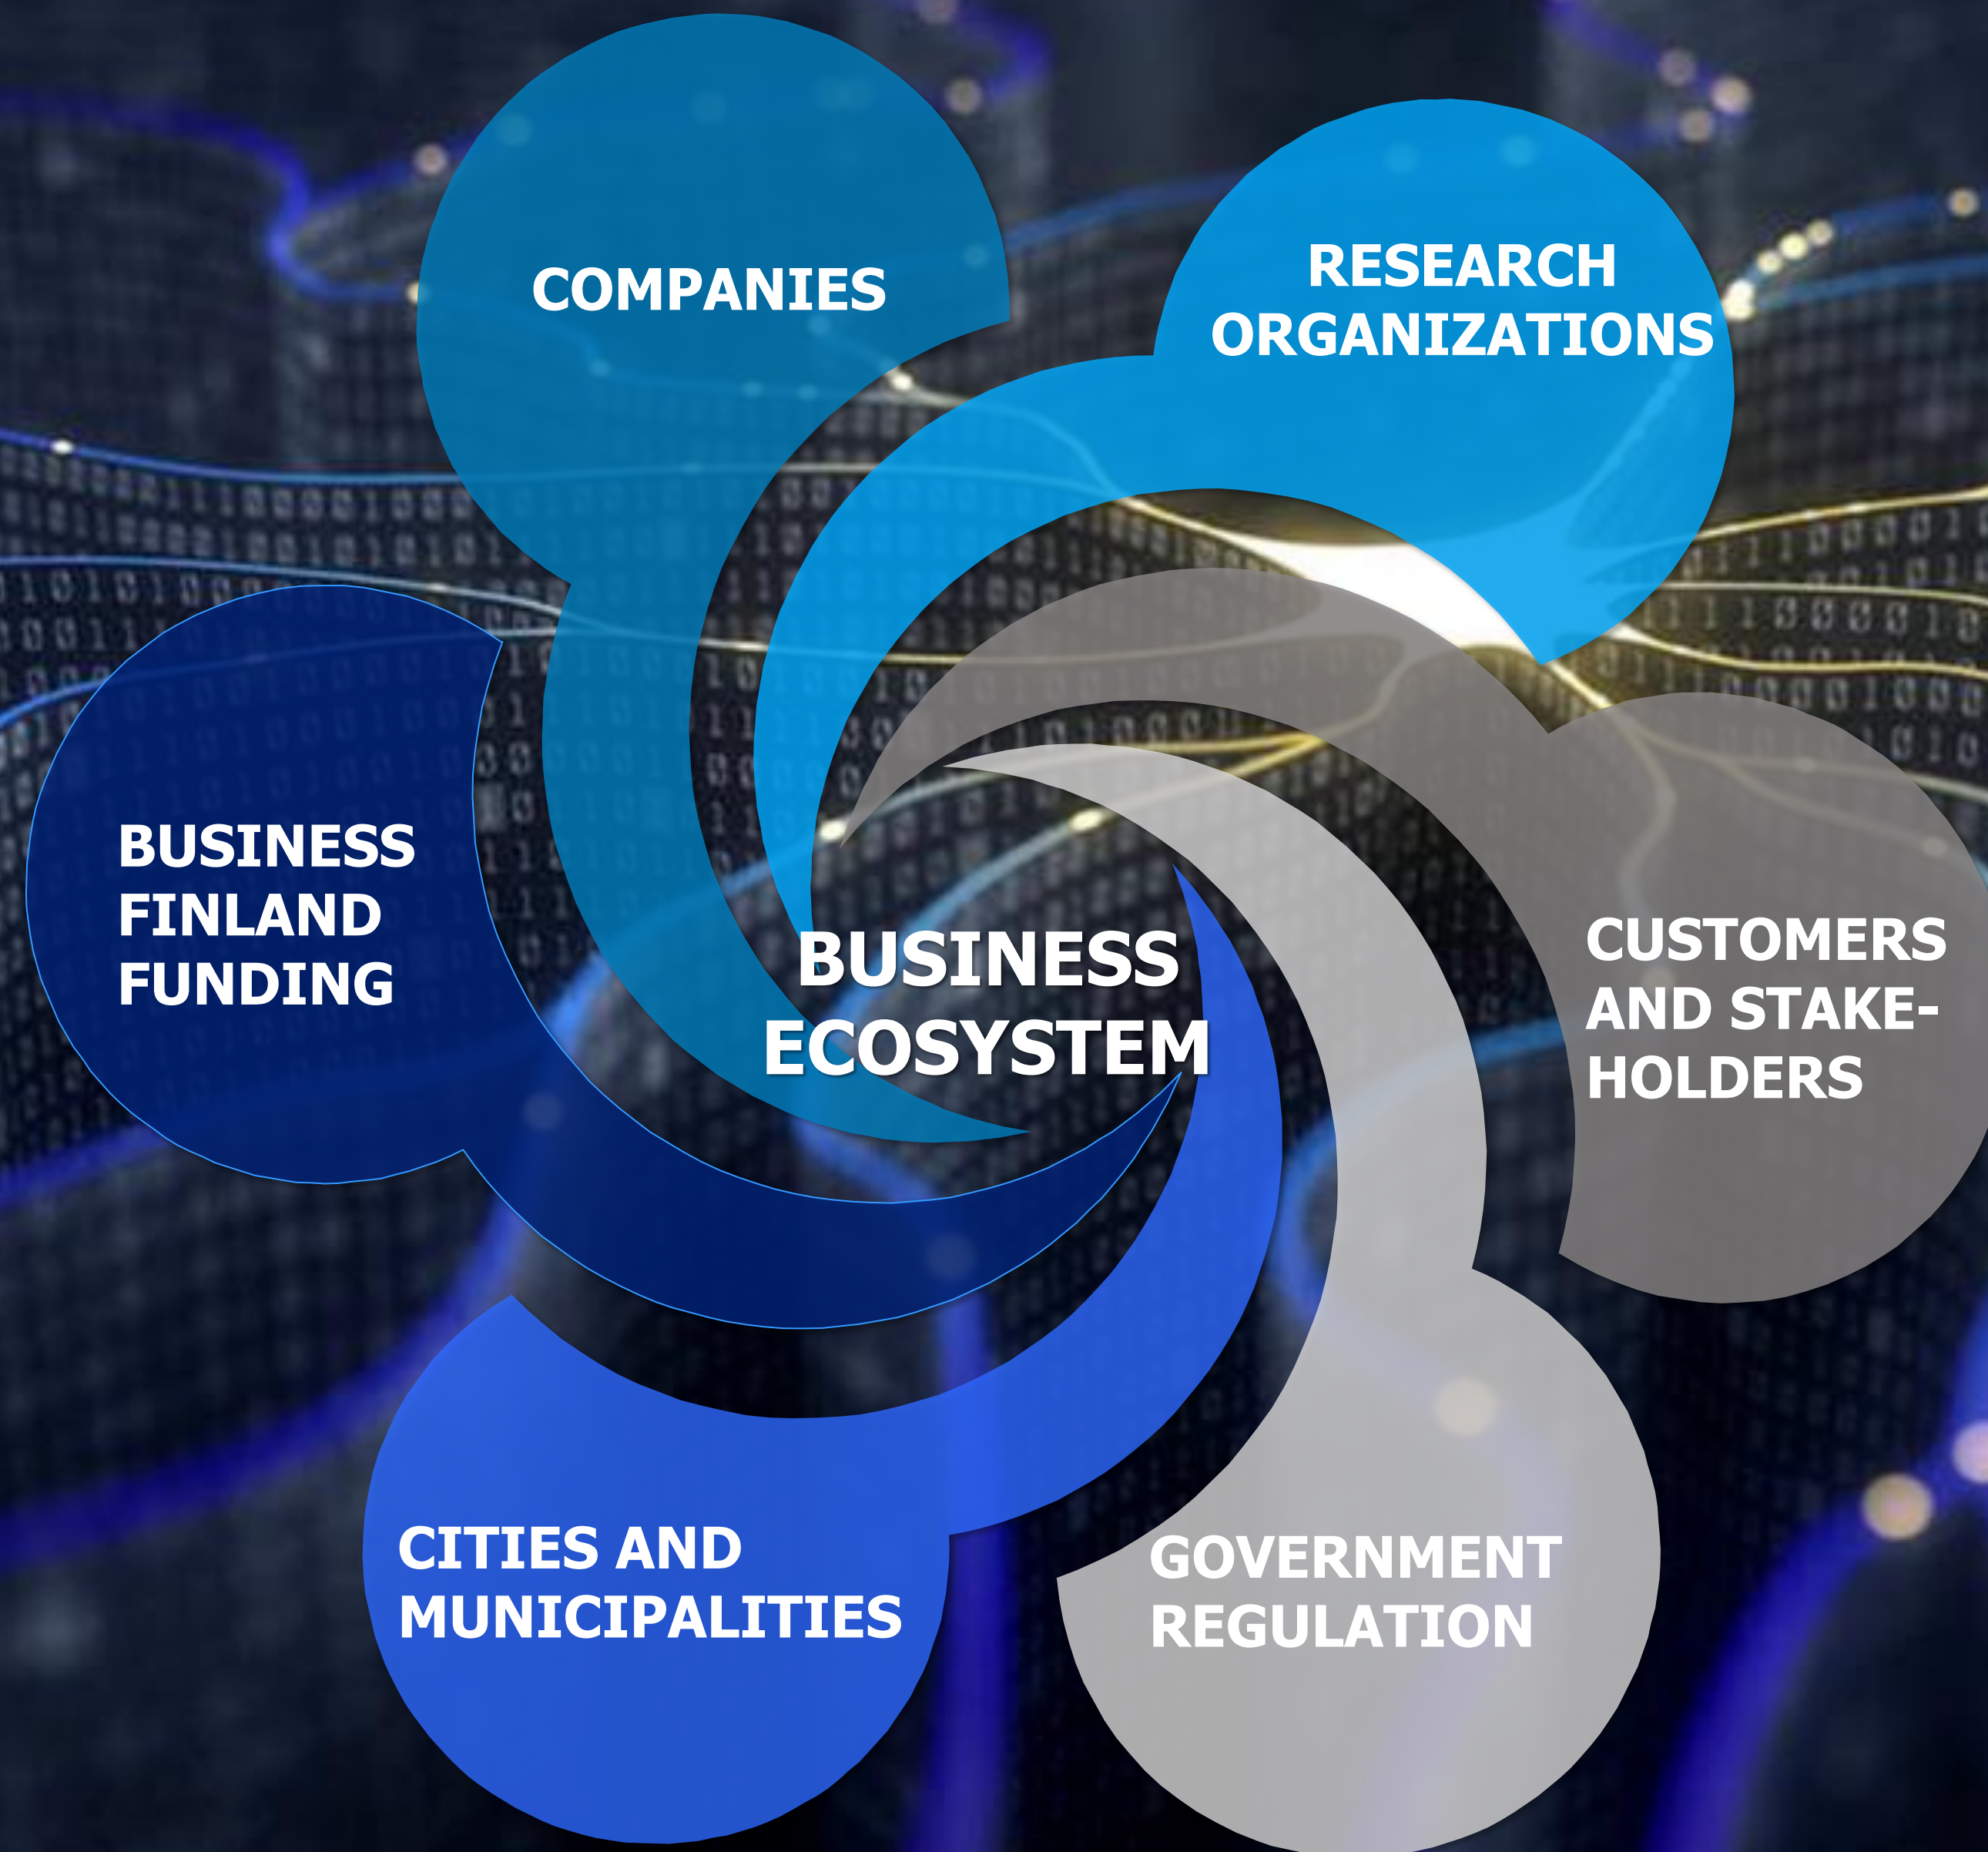

For companies registered in Finland the program offers innovation funding, market intelligence, networking and internationalization services e.g. trade missions

Targeted at companies, research organizations, municipalities and cities, and e.g. service, ICT and manufacturing industries

Challenge Competition for an own development project or a joint-project with other companies and research institutes

# Business Ecosystems generate growth and innovation

# SMART LOGISTICS

The supply chain is being transformed by smart mobility solutions.

With digital expertise and industrial know-how, Finland is well positioned to be a global leader in smart logistics.

- ☐ Business models
- ☐ Digitalization
- ☐ Ecosystems
- ☐ E2E supply chain solutions
- ☐ Autonomous technologies
- ☐ Sustainability
- ☐ Data sharing
- ☐ Platform economy
- ☐ Trust, safety & security
- ☐ PPP
- ☐ Standards
- ☐ Testbeds
- ☐ ...

# FUNDING FOR INTERNATIONAL GROWTH

Impacts for  
Finland

**Horizon 1:**  
Grow current  
business, 1-2 years

**Horizon 2:**  
Build emerging  
business, 2-4 years

**Horizon 3:**  
Create options for the  
future, 5-10 years

Time

# Why international R&D&I ?

Never join only to get money.....but instead seek for:

- Cooperation in European networks
- Implementation of risky innovations
- Best competence in Europe to help you
- Influence to the sector technologies, practices and standards

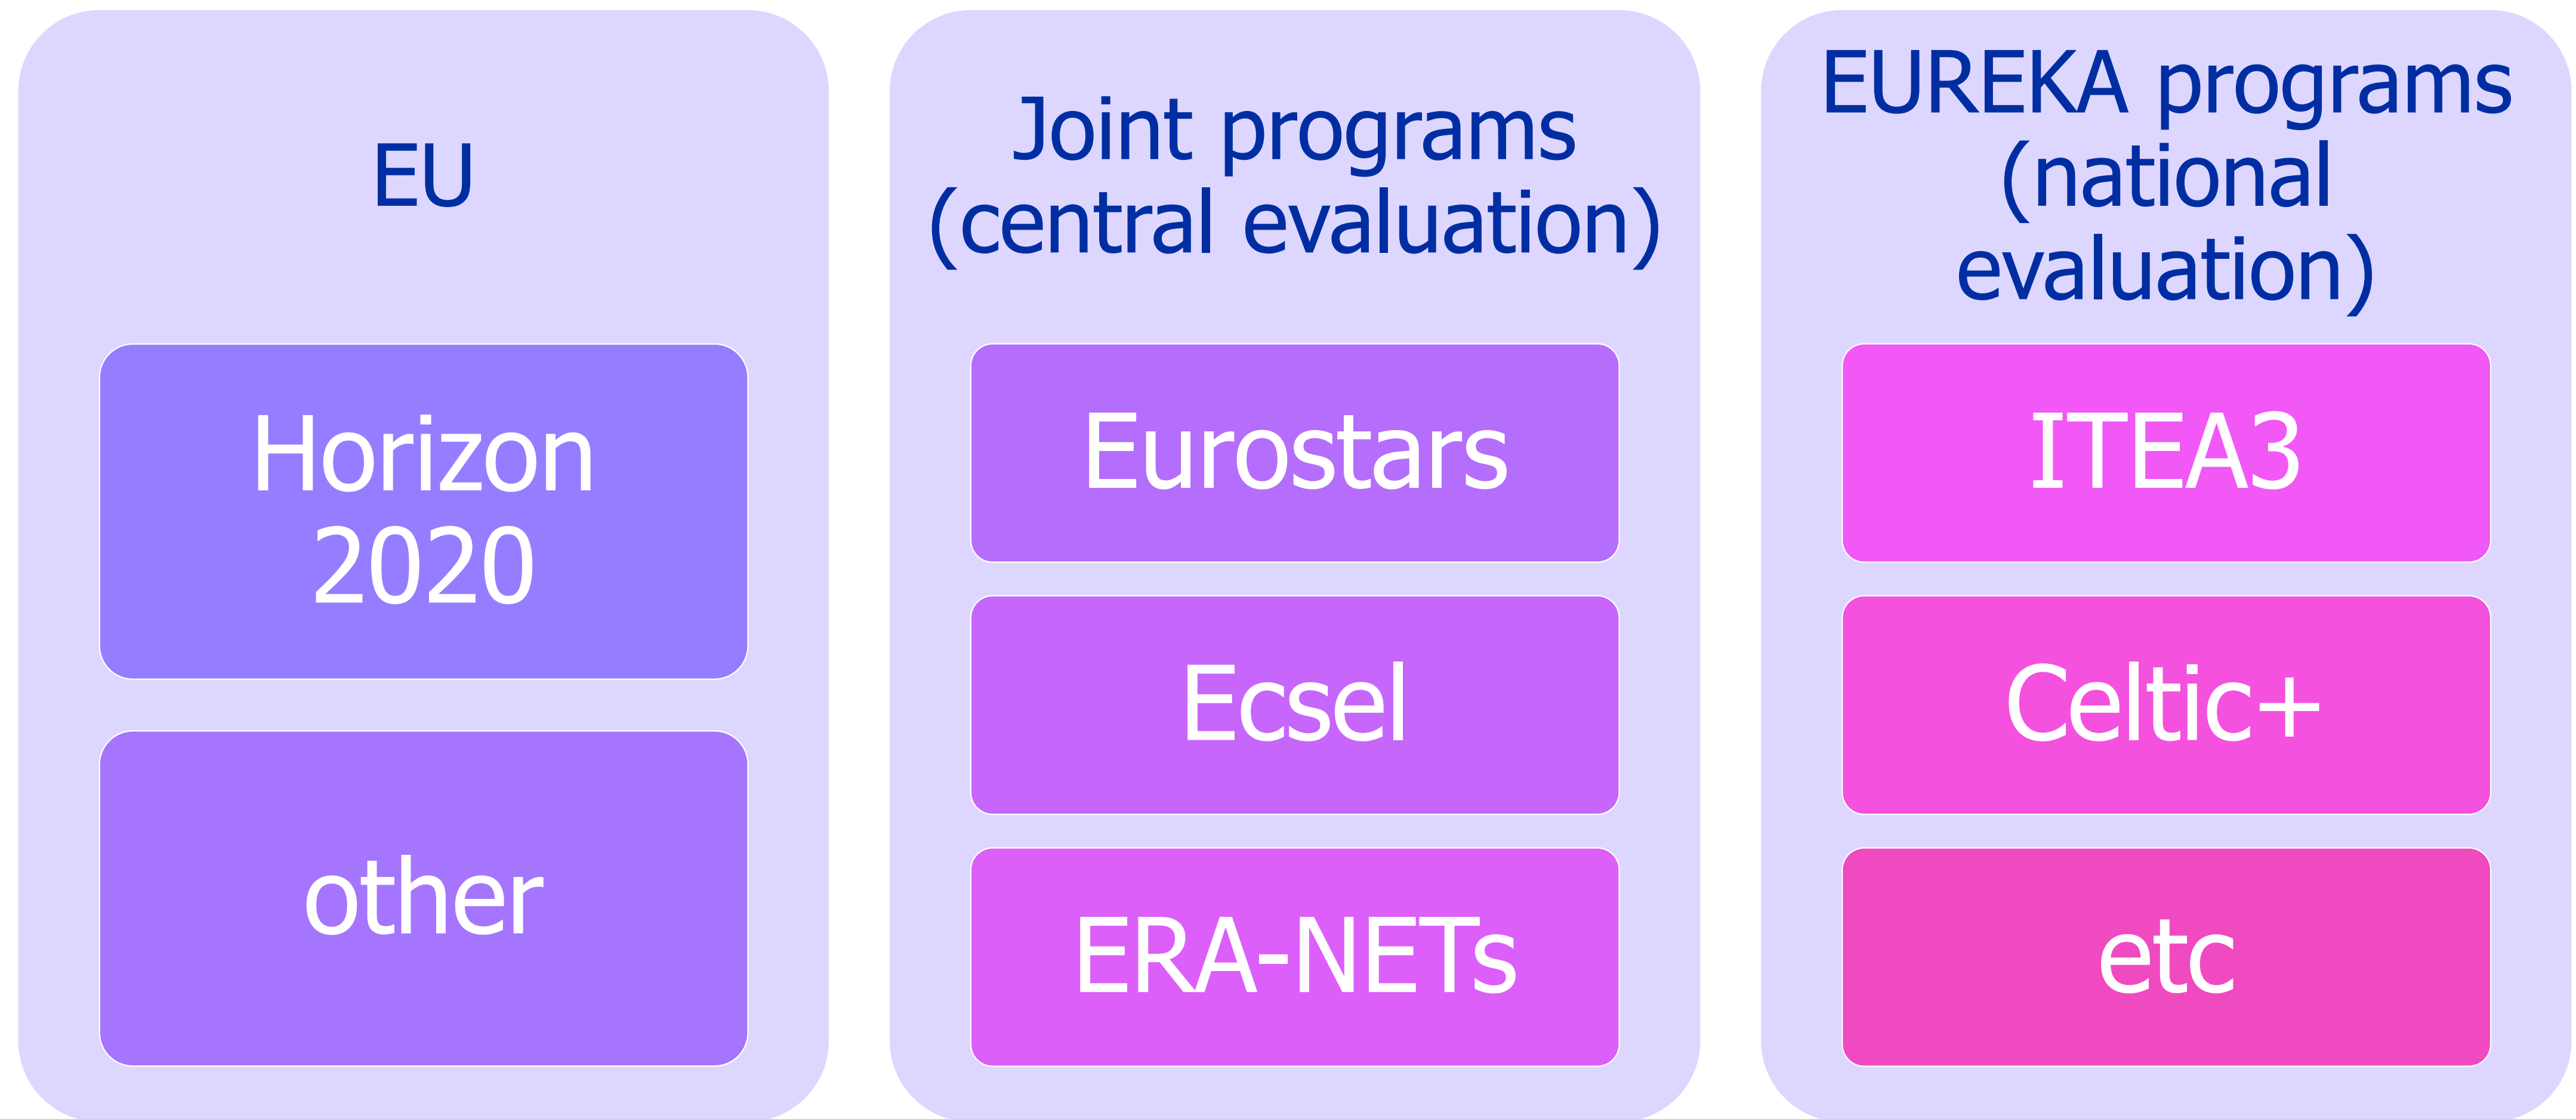

Please take into account:

- Immaterial property questions
- Timeline for application, negotiation and contract
- "Bureaucracy" along the project

# European models of R&D&I funding

# EU's framework programmes

Horizon 2020  
80 mrd.€

Horizon Europe  
94 mrd.€

- Collaborative projects (2/3)

# MG-2-13-2020: Coordination & support for an integrated freight transport and logistics system

- Specific Challenge: Ensuring the seamless integration and harmonisation of transport modes.....freight transport decarbonisation and competitiveness. To this purpose, the assessment of progress, gaps and barriers is necessary. It is also key to involve .end users and ...key actors in charge of developing the business cases.
- Scope:  
Proposals shall address all of the following areas:
  - Perform ..analysis of the products, services, solutions ..and other value added results generated by EU-funded projects.
  - Identify and prioritise gaps in the research landscape and market needs to be tackled by future R&I actions
  - Support the wider engagement of the freight transport and logistics stakeholders
  - Engage with relevant sectors beyond freight transport and logistics to support crossfertilisation

# MG-4-7-2020: Digitalisation of the transport system: data sharing

RIA

- Specific Challenge: ....the challenge lies in ensuring that e.g. manufacturers, operators, or authorities can properly take advantage of the data produced for the improvement of their operations and services. Access to, reuse and storage of data is not only important for private companies active in the transport industry (business-to-business or B2B), but also for the public sector (business-to-government or B2G) .... On a more advanced level, in order to provide connectivity across the various components of the multimodal transport system, ..., we need solutions....Cloud based solutions could provide a high level of integration and accessibility of transportation data...Challenges will have to be tackled ..., such as data privacy and security, standardisation and competitiveness issues, data interoperability and accessibility, governance, etc.
- Scope: The proposals should cover all following aspects:
  - A comparative analysis of the transportation data regulation across all transport modes in the EU;
  - Identify transport flows for which digitalised processes and transport data exchange will make most impact;
  - Identify functional requirements ...for data sharing across the transport system and with the public sector ...taking into account the FAIR data principles as well as the private data sharing principles...
  - Building on existing standards adopted (e.g. DCAT-AP) propose standards for transport data sharing (incl formatting, metadata descriptions, etc.) that would strike an appropriate balance betw sharing data and proprietary rights. ...
  - Analyse the relationships between private and public ... to data sharing principles;
  - Examine the role of data sharing culture .., analyse methods that foster trust in transport data networks;
  - Consider commercial and competitive risks of data sharing on an international scale; the potential for EU to set global standards for data sharing;
  - Identify main privacy and security issues associated to data sharing, including preventing data misuse;
  - Identify appropriate governance structures and/or processes for the establishment of a possible Transport Cloud

Proposals should identify and build on the most relevant previously funded EU and national projects and reports such as Transforming Transport, BigDataEurope, NOESIS, LeMO, OPTIMUM, SELIS, AEOLIX, oneTRANSPORT, EfficienSea2.

Euroopan tutkimus- ja innovaatiojärjestelmän  
uudistaminen ja tehostaminen

# Building the new framework program *Horizon Europe*

- Horizon Europe Strategic Planning has started
- A strategic Shadow Committee has been formed with the member states (Finland: Hanna Vuorinen (TEM) and Saara Vihko (Academy of F))
- Deals with the partnerships, especially autumn-19
- Consultation (for this partnership until 6 Nov 2019):
  - [https://ec.europa.eu/info/law/better-regulation/initiatives/ares-2019-4980251\\_en](https://ec.europa.eu/info/law/better-regulation/initiatives/ares-2019-4980251_en)
- Strategic planning ready due end 2019
- BF encourages all sectors to give their views in the consultation
- Our Ministry prepares Finland's viewpoint
