BASIC INFORMATION FOR APPLICATION

PERSONS

The person who creates the application automatically becomes the administrator of application. The administrator of application has administrative rights over user rights. Add the names of the persons in charge and contact persons who will fill in or review the information in the application.

Testaja, Testi
★ Administrator of application

Correct person information

New Person

By adding a person you will give them rights to fill in the application.

+ Add a person

RESPONSIBLE AND CONTACT PERSONS

Contact person

Testaja, Testi

The contact person will liaise with Tekes.

Responsible person

Testaja, Testi

The person in charge is an employee of the applicant organisation authorised to make decisions in relation to the project and is responsible for its implementation.

Cost statement contact person

The contact person for the cost statement is an accountant from the organisation's own financial department or an accountancy firm.

Tekes

Basic information for application 2/2

PROGRAMMES AND OTHER CONNECTIONS

If your application is associated with Tekes programmes, select a programme here

Only fill in the programme information if you know that you are applying for a programme, or the application's connection to a programme has previously been agreed with a Tekes representative. Otherwise, leave this field blank. 

Unrelated to any Tekes programmes

Public description

This description is required for public research projects, corporate projects belonging to Tekes programmes and projects for which funding has been applied from the European Regional Development Fund (ERDF).

0 / 2000 characters

Public description in English

This description is required for public research projects, corporate projects belonging to Tekes programmes and projects for which funding has been applied from the European Regional Development Fund (ERDF).

0 / 2000 characters

Reference data requested in call for applications (e.g. campaign information)

If the call for applications included a request for reference data, you can add it here. For example, ZIM search.

PROJECT GOALS

What are the project's goals and expected concrete results?

0 / 3000 characters

Describe how the project will support the organisation's strategy

0 / 3000 characters

Need

Which identified need or business problem (or something that may open up new business) does the project address? Do not just deal with mega trends; be precise about the actual need that this research is seeking to solve. Especially 'New knowledge and business from research ideas' projects: what kind of market potential and business scalability can you see with this solution?

0 / 3000 characters

Tekes

DM 1776327

Project goals 2/3

Solution

Describe how the solution to the need and the new skill will be achieved, and the role played by this research in reaching the solution.

0 / 3000 characters

Benefits

What new knowledge will be generated by the project, and what economic and social benefits can it have? How significant is the new expertise in terms of business competitiveness and renewal? Research ideas converted into new information and business: what are the primary routes of commercialising the idea?

0 / 3000 characters

Competition

What is internationally new in the research and how does the solution under development differ from competing solutions?

0 / 3000 characters

DM 1776327

Project goals 3/3

Capabilities

What new skills are required (both in this project and in the further development of the results) in order to reach the objective? Will the expertise be expanded by means of new partnerships (such as an international network)? Especially 'New knowledge and business from research ideas' projects: describe the expertise held by the team and the project's steering group and how it contributes to the entire system.

0 / 3000 characters

Intellectual property rights

Does the research organisation own all the research intellectual property rights or do other parties (including researchers and partners) hold any of the rights related to the solution? Will the results be protected under intellectual property rights (patent, copyright, trademark)? How can you ensure that any commercial use of the results will not infringe on other patents or intellectual property rights?

0 / 3000 characters
