CO-CREATION:

New life for polystyrene (PS) waste, monomers from end-of-life polymers (MoPo)

AIM & CONTENT OF THE CO-CREATION PROJECT:

New overall solution for polystyrene (PS) waste will be created integrating mechanical and chemical recycling.

BENEFIT & COMPETITIVE ADVANTAGE OF THE SOLUTION:

Improved PS utilization diminishes harmful waste in nature. New sustainable business for companies along the whole value chain will be created.

TARGET MARKETS & GLOBAL MARKET POTENTIAL:

The global PS market is growing, having in EU market value of ~ 6 M€. Catering for the producer responsibility, a significant market share can be expected.
