

# ATTACHMENT TO BEAM REPORT

Development impacts in the developing country

---

*This attachment is part of the project's interim or final reporting to Tekes BEAM. Please describe the achieved development impacts in developing countries in as much detail as possible. You can report both intended and unintended impacts. Don't report any unachieved impacts that the project may produce in the future.*

## 1. PROJECT IDENTIFICATION DATA

Choose one of the following	<i>Interim report / Final report</i>	<i>Company project / Public research project</i>
Project title:		
Abbreviation:		
Diary number:		
Decision number:		
Reporting period:	<i>dd/mm/yyyy – dd/mm/yyyy</i>	
Organization's name:		
Y-number:		
Contact person:		
Phone:		

## 2. DEVELOPMENT IMPACTS

Please describe in detail what development impacts the BEAM project has achieved in developing countries:

**Impacts on working conditions** (e.g. improved occupational health, improved work welfare, improved work-related social benefits, improved work safety)

**Impacts on governance, participation and security** (e.g. improved anti-corruption measures, improved transparency of institutions, improved rule of law, improved societal participation, improved women's inclusion, reduced violence, reduced crime, improved non-discrimination)

**Environmental impacts** (e.g. cleaner water, improved sanitation, cleaner air, cleaner soil, safer and more nutritious food, protected ecosystems, protected biodiversity, reduced desertification, reduced waste, reduced energy use, improved energy/material efficiency, improved climate sustainability)

**Impacts on access to services and welfare** (e.g. improved access to social and health services, improved diseases and health risks, improved preparedness to disasters, improved access to education and learning, improved access to information, improved access to infrastructure and transportation, improved housing)

**Impacts on capacity development** (e.g. .g. new knowledge, new skills, improved use and transfer of technology, improved innovation knowhow, increased environmental awareness); **whose capacity was developed?**

**Did the project experience any negative impacts on the above-mentioned issues and on whom?**

### **3. IMPACTS ON INCLUSION, COOPERATION AND PARTNERSHIPS**

***Who were the end users and final beneficiaries of the innovation and project in developing countries? How did they participate in the planning and implementation of the project?***

***What impact did the project have on longer-term cooperation and partnerships between Finland and developing countries (e.g. between/among public and private sectors, civil society, research and educational institutions)?***

### **4. ADDITIONALITY**

**What additional resources (external to the project) did the project create** (e.g. volume of increased external finance, approximate value of other external resources such as work, products, services)?
